## Session Statistics II - Day of Week Averages and Projecting Volume

Duration:11:27

Variable speed version: [Watch](#) <sup>[1]</sup>

This video demonstrates some new functionality added to Session Statistics in 9.2.13 and beyond including the ability to compare the volume of each bar or time period with average volumes over the same time periods on same day of week during previous weeks. It also discusses projecting the current bars volume when computing relative strengths of volume.
